

Automated Truck Attendant Equipment

Safer, **more efficient** truck offload

Site managers and truck drivers love this system that makes positioning vehicles for loading and unloading as simple as watching a signal light. The system also provides tank level monitoring to prevent tank overflows during operation. This equipment works day and night and saves on labor costs while improving safety for drivers and site workers. Set up is simple and ready to go in just hours.

Features of automated traffic management for truck offload:

- **Autonomous traffic control lighting** for traffic management
- **Light & alarming** for backup
- **Designated traffic lanes** with lbarriers
- **Automated level monitoring** provides drivers with visibility to tank levels & capacity.

Safety Features:

- **Eliminate risk** of truck attendant injury on site
- **Prevent tank overflows** with real time visibility of tank levels
- **Streamline operations** & enhance water management
