

# Bypass & Dewatering Services

**FieldForce** provides equipment rentals and related services for the municipal, construction, manufacturing, and industrial sectors. Within our fleet, we carry Atlas Copco pumps, compressors, and generators available to rent or purchase. In addition, FieldForce also carries temporary piping, filtration equipment, light plants, and heaters available to rent.

FieldForce can deploy rental equipment for bypass, dewatering, and other temporary pumping services throughout the Northeast United States.

Rely on FieldForce to deliver solutions for complex water management projects, including temporary pipeline, specialized filtration, and maintenance events.

## Bypass & Dewatering Services include:
