# Pumping & Power

Need it? **Call us. Done.**

SERVICE | SALES | RENTALS

Rental pumps, generators, compressors and more

We have everything you need to get water moving – Pumps, generators, compressors, temporary piping, tanks and water storage, and filtration.

## Available equipment

**Pumps** — Submersible, diesel, electric, vertical turbine, high head

**Generators** — Diesel and gas-powered

**Compressors** — Mobile diesel and electric

**Temporary Piping** — HDPE Pipe and lay flat hose

**Water tanks** — 500-barrel portable tanks, temporary above-ground impoundments

**Light plants** — Solar hybrid LED light towers

## Pumping and power services and equipment 24/7

**FieldForce** provides the expertise and equipment for projects large or small. We can analyze and engineer solutions for the simplest to the most complex water and wastewater problems.

These solutions include equipment rental or sale of pumps, generators, and compressors to run onsite for the duration of your project.

We can manage system design and engineering, delivery, set-up, oversight and tear-down of your project using our large workforce and well-maintained asset base.

We offer  
**full-service solutions**  
**wherever** and **whenever**  
you need them

### Turn-key project design and installation

Anyone can drop off a rental pump and pick it up later. But we offer our decades of experience in planning and managing complex water management solutions along with our equipment. We can help you match the right specs for your needs and even plan your entire project from beginning to end.

### Dewatering

We can handle any dewatering project from mines to quarries to construction sites, even flooded roadways. Call us 24/7 and we'll be there to help.

### Bypass pumping and temporary pipelines

Whether planned or unplanned, we can design and install sewer or water main bypass projects and/or build temporary pipelines as needed to keep water flowing.

### Rapid response

Call us anytime and we will respond quickly to your most urgent needs. We have multiple equipment yards in Pennsylvania and West Virginia, so equipment is always close by.

### Specialized filtration

We can provide advanced filtration on a temporary or permanent basis. For suspended solids, PFAS, and other treatment applications.

### WaterForce® automation and control systems

For complex water management projects, our proprietary WaterForce automated control system provides efficient remote monitoring and adjustments as well as system alerts.

## Why Do Customers Choose FieldForce?

- Expertise in water and wastewater management to **execute projects quickly and efficiently.**
- Flexible manpower support allows contractors to **meet incremental customer needs using qualified staff.**
- Equipment rental services with **delivery options and hot shot trucking capabilities.**
- Advanced technology and **engineered solutions** to support complex water management projects.
- Reliable service from a local workforce – **we live and work in the markets we serve.**
